

Forget about lost and damaged crates – explore a one way recyclable crate.

This packaging system incorporates the use of a plastic H crate with a corrugated board crate. This allows for both the benefits of a plastic H crate and the benefits of corrugated crates to be optimised.

- Allows for plastic and corrugated board crates to be used together.

- Designed as a one way transit, therefore reducing the opportunity for lost crates.
- Only one crate needs be returned per stack – corrugated crates can be disposed of in paper recycling.
- Potential to save space
 - › caps and corrugated crates are delivered flat.
 - › caps and corrugated crates are made to order with a fast turn around - potentially hold less stock on site.
- Crates have stacking lugs to aid in stack stability.
- Can be printed up to four colours for branding.

The patent pending design of a corrugated cap that sits atop a plastic H crate allows for multiple corrugated board crates to be stacked.

The information contained here is for general information purposes only. Details on assembly and use should be discussed with your Carter Holt Harvey representative prior to use.

The Solution Centre

The solution centre is Carter Holt Harvey Packaging's centre of excellence. It plays a vital role when it comes to the process of developing new products or re-engineering current solutions.

The Solution Centre gives customers the opportunity to spend time with a dedicated team of specialists through the use of appropriately structured teams.

These teams are virtual and cross functional including customer representation to ensure the best result for our customers at all times. From structural design to packaging

systems and pre-press, we have the know how to take your business to the next level.
